# Planning problems are wicked

## Dilemmas in a General Theory of Planning\*

**HORST W. J. RITTEL**

*Professor of the Science of Design, University of California, Berkeley*

**MELVIN M. WEBBER**

*Professor of City Planning, University of California, Berkeley*

- ▶ Unstructured: difficult to sort out causes and effects
- ▶ Cross-cutting: have many overlapping stakeholders
- ▶ Relentless: can't be solved, once and for all

# Why Blacksburg, VA, Is a Best Place to Live

Author and Blacksburg local Melody Warnick gets to the heart of what makes this tight-knit town so special.

By [Melody Warnick](#) on January 19, 2018 13:13 PM

# Virginia Tech president focuses on growth

- ▶ Housing for up to 5,000 additional students
- ▶ Problems and advantages of student housing
- ▶ Preserving neighborhoods and quality life

By Tonia Moxley [tonia.moxley@roanoke.com](mailto:tonia.moxley@roanoke.com) 381-1675 , Jul 5, 2015

# Conventional methods are counterproductive

- ▶ Achieving genuine participation in planning
- ▶ Satisfying the public that they are being heard
- ▶ Improving the final decisions
- ▶ Incorporating a broad spectrum of the public

# Coronado Bridge in San Diego

PHILLIP COLLA  
OCEANLIGHT.COM

# Chicano Park takeover, 35 years of struggle

By the time the San Diego-Coronado Bridge opened in the summer of 1969, the development of Interstate 5 had left 5,000 homes and businesses destroyed in Barrio Logan.

Then the California Highway Patrol announced plans to build a substation below the bridge in 1970.

# Why is engaging the public important?

- ▶ Local knowledge
- ▶ Buy in
- ▶ Impact social good

# Best practices are workshops and design charrettes

## Why design charrettes are hard?

“An impossible problem in an absurdly short time”

Condon, 2007

# I build & study human-centered collaborative tools

# Urban design processes

Consultation

Alternative generation

Alternative measurement

Preferred alternative development

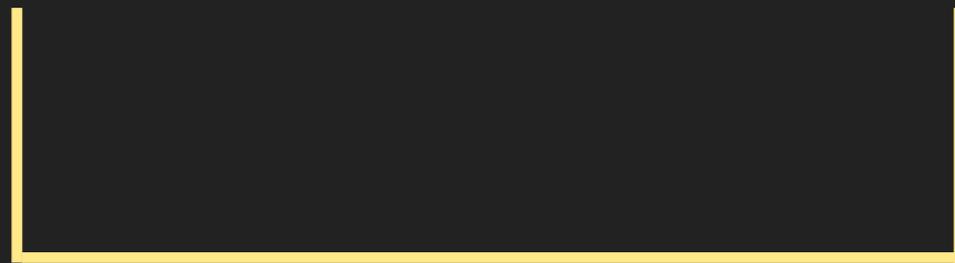

Goals setting

Alternative visualization

Alternative evaluation

Implementation

lack of tool support

Girling, C., Kellett, R., and Johnstone, S., 2006

# Problem: lack of tool support during design charrettes

- ▶ Integrating data and **visualizations** of information
- ▶ Employing **interactive** modes to engage people
- ▶ Employing **social** and peer learning

Sheppard, 2012, Moser, 2010, Holden 2008, Davis, 2008, Al-Kodmany 2000

# URP: tangible workbench for urban planning and design

# Design of digital technology to avoid marginalizing people

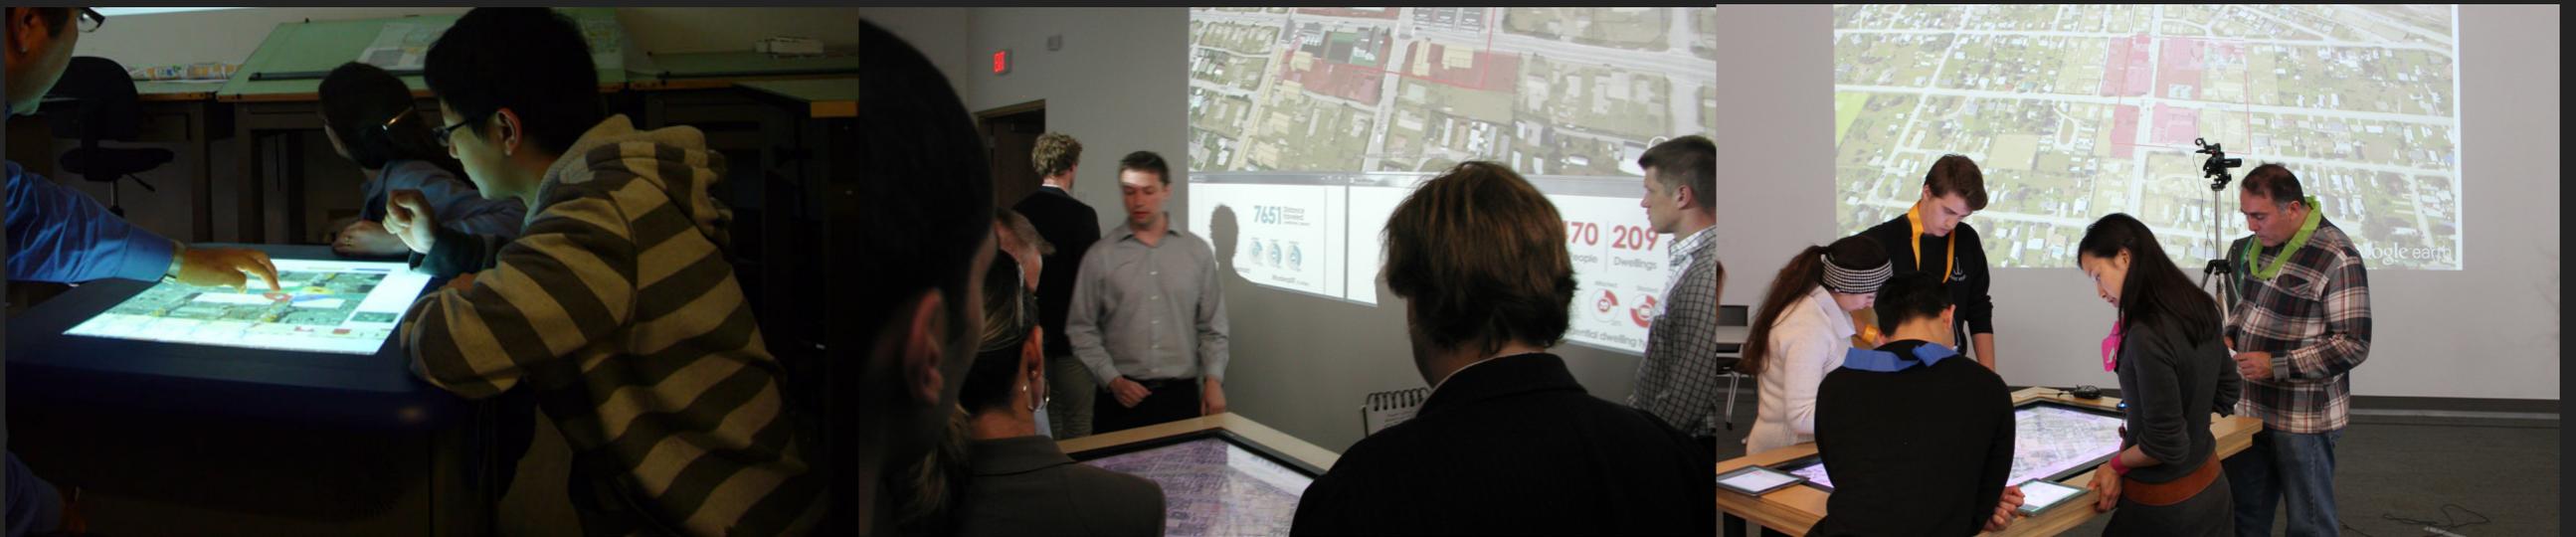

- ▶ The importance of providing the right information at the right time in understandable formats.

# Research questions

- ▶ How to use collaboration technology & visualization techniques to
  - ▶ engage diverse stakeholders,
  - ▶ foster collaboration and co-creation,
  - ▶ increase understanding of impacts of choices?

# 6 years human-centered design and development process

This was a long-term interdisciplinary project that started before I arrived at UBC.

1st version: tabletop tool

2nd version: wall display

3rd version: handheld

# UD Co-Spaces (Urban Design Collaborative Spaces)

# My role

- ▶ Lack of engagement with metrics on the wall
- ▶ Lack of interactivity and customization to engage ppl
- ▶ Lack of personal spaces
- ▶ Difficulty interacting in parallel with the 3D view

# Method

- ▶ Analysis of version 2 deployment in the wild
- ▶ Interview with urban planners & facilitators
- ▶ Design & development of version 3
- ▶ Heuristic evaluation with 3 urban planners
- ▶ Formal evaluation (comparative study)

# System design & considerations

- ▶ Adding personal spaces
- ▶ Increasing interaction with wall display
- ▶ Building interactive visualizations
- ▶ Providing accessible and understandable information

# Comparative study

# Design context

- ▶ Design a neighborhood center within a hypothetical existing single family neighborhood in the suburbs of Vancouver.
- ▶ Main Goal:
  - ▶ Increasing the walkability of the neighborhood

# Study procedure

- ▶ 40 participants (groups of 5-6, 17 male, 23 female)
- ▶ Total time: 140 min (~45 min for design activity)
- ▶ Pre & post survey
- ▶ Focus group
- ▶ Video recorded sessions

## Findings: Tabletop surface increased equity of participation

“Having this tabletop got every stakeholder involved so they can make changes themselves, see those changes right away, [which] promotes collaboration”

# Multi-display environment catalyzed discussions

"I definitely really liked how everything was synced, specially with regards to 3D, iPad and table itself"

# Visualization dashboard increased analytical ability

“Having indicators in real time definitely altered how we approached the project, we could see the larger impact ... it was almost like stepping out and saying, okay, what did we actually do and what is the impact.”

## Main contributions

- ▶ UD Co-Spaces was superior than paper-based
  - ▶ Engaging collaborative environment
  - ▶ Alternative generation and measurement
  - ▶ Making information and visualization accessible

# Contributions beyond urban design domain

- ▶ Potential of touch-based interactions
  - ▶ Increase interactions, engagement & learning
  - ▶ Transition novices to experts

# How can we scale it up to engage a broader range of stakeholders?

# CommunityCrit: Inviting the Public to Improve and Evaluate Urban Design Ideas through Micro-Activities

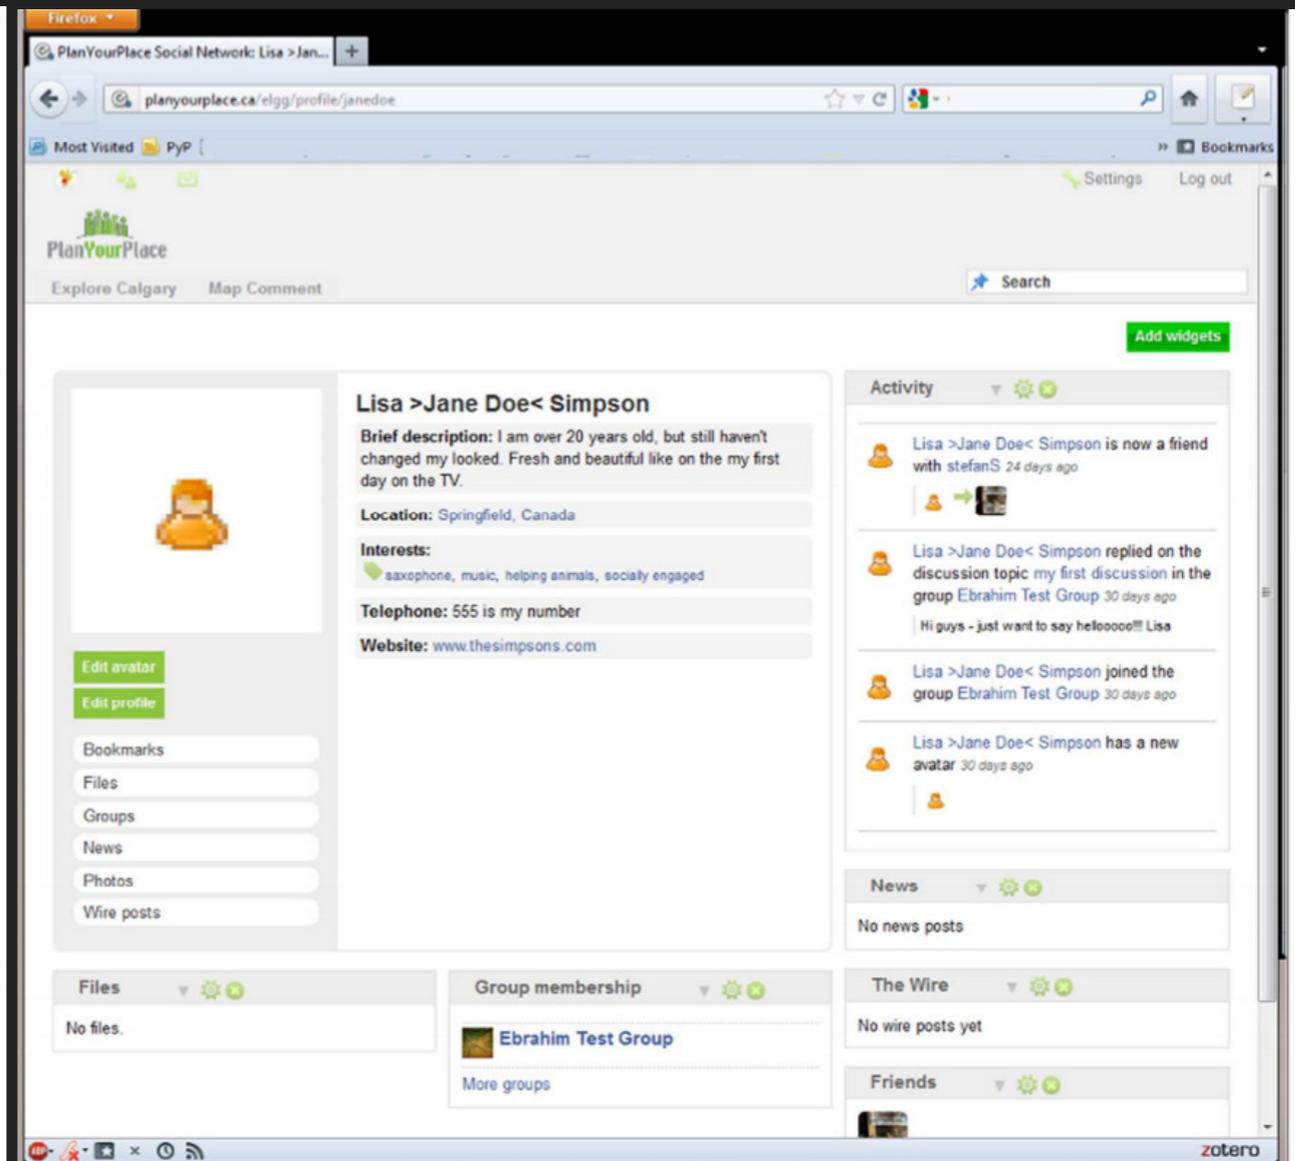

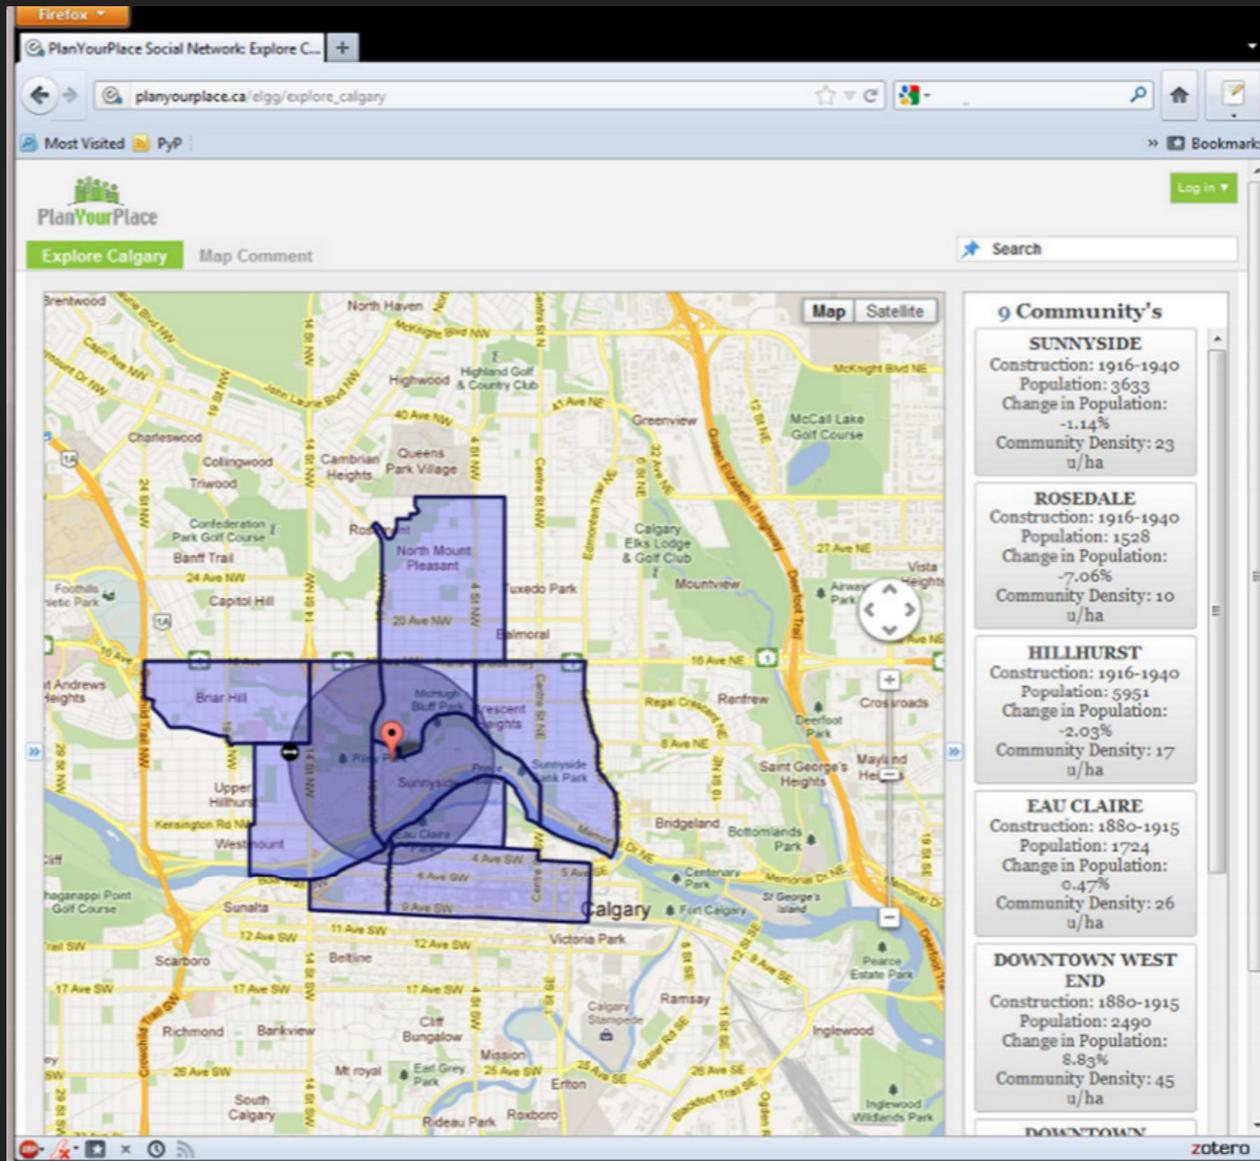

**Narges Mahyar, Michael R. James, Michelle M. Ng, Reginald A. Wu, Steven P. Dow, ACM Human Factors in Computing Systems (CHI 2018).**

# Face to face methods have many limitations

- ▶ Engaging representative stakeholders
- ▶ Hearing out people's comments
- ▶ Recording/disseminating comments

# Urban design tools require time investment and expertise

S. Steiniger, M. E. Poorazizi, C. AM Bliss-Taylor, E. Mohammadi, and A.JS Hunter. 2012.

# Online civic technologies often limited to opinion polling

**Which idea do you think is more important for transportation in Illinois?**

Subsidize bus and rail transit for users

Be consistent in ways that respect both pedestrian and vehicles. For ex, use public funds to shovel sidewalks and not only streets.

I can't decide

33926 votes on 185 ideas

Add your own idea here...

The image shows a screenshot of a WikiSurvey poll. At the top, the question is "Which idea do you think is more important for transportation in Illinois?". Below the question are two blue buttons representing different ideas. The left button says "Subsidize bus and rail transit for users". The right button says "Be consistent in ways that respect both pedestrian and vehicles. For ex, use public funds to shovel sidewalks and not only streets.". Below these two buttons is a white button with a grey border that says "I can't decide". Underneath the "I can't decide" button, it says "33926 votes on 185 ideas". At the bottom of the poll interface is a large white text input field with the placeholder text "Add your own idea here...".

WikiSurvey: M. J. Salganik and K. EC Levy. 2015.

# Research question

- ▶ How can we create a system for activities beyond opinion polling that
  - ▶ captures quality feedback
  - ▶ in a short amount of time?

# System design & considerations

- ▶ Providing a quick & flexible workflow
- ▶ Designing understandable questions
- ▶ Providing social interactions
- ▶ Sending people directly into quick activities

<http://cc.ucsd.edu>

## CommunityCrit allows **the public** to participate in the urban design process.

By offering a quick and easy way to voice opinions, CommunityCrit empowers anyone to help shape the future of their community.

Currently, we are collecting feedback on an effort to expand the 14th Street Promenade in East Village. The intersection of 14th Street, National Avenue, and Commercial Street—referred to as “El Nudillo,” or “the knuckle”—is envisioned as a pedestrian destination, a place of social gathering, and a celebration of East Village and its surrounding neighborhoods.

**What do you think El Nudillo should be?** Please click below to contribute your voice!

**GET STARTED**

# Design case: El Nudillo a key intersection in San Diego

## Background Info on El Nudillo

The 14th Street Promenade, which was approved by the city in 2016, will be a pedestrian-friendly "green street" extending from City College in the north to the intersection of 14th Street and National Avenue in the south. It will feature widened sidewalks, outdoor furniture, and art, in order to promote social gathering and a unique neighborhood feel. The overarching goal for the 14th Street Promenade is to help create a more sustainable, walkable downtown.

We are now engaging the public and local experts to develop the intersection of 14th Street, National Avenue, and Commercial Street, which marks the end of the 14th Street Promenade. This intersection—known as **El Nudillo**, or "the knuckle"—is envisioned as a pedestrian destination, a place of social gathering, and a celebration of East Village and its surrounding neighborhoods.

## Idea: Build a tower

Submitted by a workshop participant.

Build a tower in the center of EL Nudillo. Sketches of tower concepts as shown.

### Question 1/5

### How could this idea be improved by taking the following submission into consideration?

#### Submission

**14th Street Promenade Workshop**  
The height limits of East Village/downtown (440 feet) and Barrio Logan (40 feet) converge here. Height should be treated in a sensitive manner.  
— This design guideline was submitted by a project organizer.

- ▶ “We have always been overlooked, so my community would be very interested in an online tool”

# Workshop ideas

## Build a tower

Build a tower in the center of El Nudillo. Sketches of tower concepts as shown.

## Roundabout

The intersection right now is basically just an empty lot. We could easily make it a roundabout with three crosswalks so that traffic from National Ave and Commercial St can still get around but so people can also use the open space in the center.

## Empowered community members to provide input

“I don’t have time to go to workshops so it provides opportunity to give feedback”. (P6)

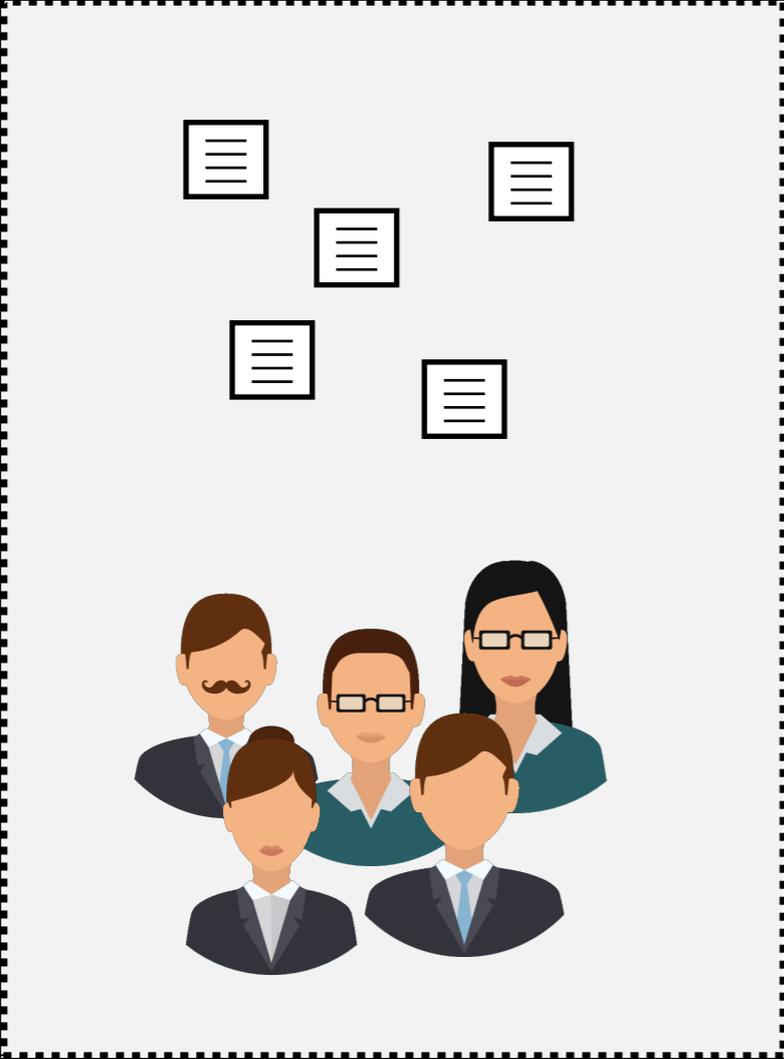

“I liked only having to answer 5 questions. I have conducted lengthy surveys myself and thought them to be excessive to the point of endangering the quality of data collection (respondents get bored, distracted, only want the "reward" etc.)” (P2)

## Urban planners saw value in public outreach

“Provides more tools for community outreach and for people to participate, and will give us a chance to present ideas that came out of CommunityCrit back to the public during the next workshop and facilitating a discussion around them.” (E2)

# Contributions: Scaling & diversifying public participation

Public Workshop

CommunityCrit

# Remaining problems

- ▶ Supporting the broader urban design process
- ▶ Authoring interface for supporting multiple projects
- ▶ Increasing participation
- ▶ Addressing marginalized perspectives
- ▶ Making sense of people's input

# Problem: difficulty of surfacing the key themes
